

THE SEPARATION & FILTRATION TEAM

Engineering Dutch Quality

The separation & filtration team

We're an independent brand. Therefore we can meet your requirements.

The key to ship management is to increase the running hours between scheduled maintenance and minimise the downtime, therefore at TULLP we believe that reducing operational costs should not compromise the quality of your vessel.

As a leader in separation and filtration technology, we understand the problems and difficulties your engineers face during the overhaul and maintenance of your equipment. Our goal is to set new quality and durability standards, to help you achieve optimal efficiency throughout the lifecycle of your separation and filtration equipment.

TULLP focusses on producing a wide range of spare parts for separators, triple screw lowpressure pumps, back flushing filters, plate heat exchangers and fresh water generators. Our fully automated in-house supply chain gives us total control over product quality and ensures full traceability of our spare parts, from raw material to final product. As we are an independent

Dutch brand, we can guarantee outstanding, unparalleled quality and offer an 12-month manufacturing guarantee to our customers.

At TULLP we continually optimise our product portfolio, creating an extensive range of stocked items. TULLP offers the most comprehensive range of spare parts for separation and filtration equipment and is therefore always able to meet your requirements. By producing locally, we can supply globally.

The unique combination of knowledge, unprecedented reverse engineering and our fully automated in-house supply chain enables us to supply high-quality products, specific and reliable maintenance solutions that will help you increase the running hours between scheduled maintenance and reduce operational costs, improving your bottom line.

Set a new course:

TULLP, your separation and filtration team.

Specialist in spare parts

Separator spare parts

- Spare parts for the entire scope of Alfa Laval and GEA Westfalia separators.
- Complete new and reconditioned separators and bowls.

TULLP SECOND LIFE PARTS

At TULLP we strongly believe in a sustainable future. We are always looking for new ways to lower our ecological footprint as a company and doing our part to achieve a greener and more responsible working environment.

With this in mind we have created a new spare part segment called “TULLP SECOND LIFE PARTS”. This segment contains used parts that we have repaired and verified to comply with the high quality standards we have at TULLP.

All TULLP SECOND LIFE PARTS are fully checked, tested and are shipped with a certificate. They have the same warranty as new parts at a reduced price.

You can recognize these parts by our green TULLP SECOND LIFE logo.

TULLP SECOND LIFE PARTS

- High TULLP quality
- Fully checked and tested
- Available items ready for shipment within 3 working days

TULLPassist / service

Combining our second life parts with the best possible service by our TULLPassist programme.

- Ready to use pre-programmed reconditioned control units and circuit boards on exchange base.
- Ready to use tested reconditioned bowls and complete machines on exchange base.
- Onboard service and repairs.
- Training and workshops (on and off site).

The TULLP Assist programme supports our customers throughout the year with on-site servicing and repair and year-round consultancy. Our engineers have received both mechanical and electrical training. The TULLP workshop also performs in-house inspections, repair and rebalancing services on all types of separator bowls. The TULLP workshop also overhauls complete separators.

Rebalance, repair or exchange

TULLP also offers a rebalance, repair and exchange programme for Alfa Laval and GEA Westfalia bowls and complete separators.

One-stop supplier

Regardless of your needs, TULLP designs, engineers and develops the products your engineers rely on to keep your vessels going. Combined with our TULLP Assist programme for all mechanical and electrical issues, TULLP maximises its added value and is your one-stop supplier for all separation and filtration requirements.

TULLP spare parts and services will help you to minimise your downtime, increase your running hours and reduce your operational costs, whilst improving the maintenance efficiency of your separation and filtration equipment. This means that TULLP is not only the best choice, but also the logical choice.

Engineering Dutch Quality

Reverse engineering is the strength and foundation of our company. Our research and development department defines the material, dimensions and measurements of every single part. Using precise measuring equipment and CAD/CAM software, we create our own technical documentation. By adapting to the latest and innovative manufacturing systems, we maintain a fully automated in-house supply chain. Therefore, when overhauling your equipment, look out for the TULLP quality label and make sure you receive genuine TULLP, high-quality, spare parts. TULLP is ISO 9001 certified.

OUR MISSION

We keep you going, worldwide.

Located in the heart of Europe's shipping community, TULLP strives to optimise the maintenance of its customers' separation and filtration equipment by minimising downtime and reducing operational costs. We offer the best spare parts through an

unprecedented reverse engineering programme, hold a comprehensive range of stock for quick and reliable delivery and have a good solid Dutch mentality, where a personal approach and high levels of service comes first.
